NEW ULTRASOUND FOR VET MARKET

Siemens Acuson X300 Veterinary Ultrasound

PGI announces the Siemens Acuson X300—the latest in ultrasound technology in a color Spectral Doppler system.

The X300 offers superior image—best in class quality.

It has a flat panel monitor with articulating arm.

Use the C8-5 curved array, the vet workhorse probe, or choose from a wide selection of probes.

Engineered with a small footprint for easy mobility, it features:

- All digital architecture
- 80GB hard drive
- Dual drive for DVD and CD read/write
- DIMAQ workstation and DICOM reports
